

# Quality Control Measures

Premier is ISO 9001:2008 certified organization, adhering to the principle of Total Quality Management. Quality is paramount for us and we leave no stone unturned to manufacture zero defect products. We strive to offer superior quality products to our clients and achieve excellence in all spheres of our activities starting from conceptualization to final dispatch of the products.

We test our products for various specifications like thickness, outside dimension (OD), zinc coating and designing as per the IS and DIS standards. Moreover, each and every pipe is hydro tested before going into the galvanizing unit. All these efforts ensure high quality products that are durable, reliable and performance oriented.

Our quality check programmes (QCP), along with our fully equipped laboratories are continuously engaged in testing and increasing quality of our products. Through our In-house Labs we are in continuous process of Research and Development which goes miles in abetting our quality performance year after year.
